

# Gravity

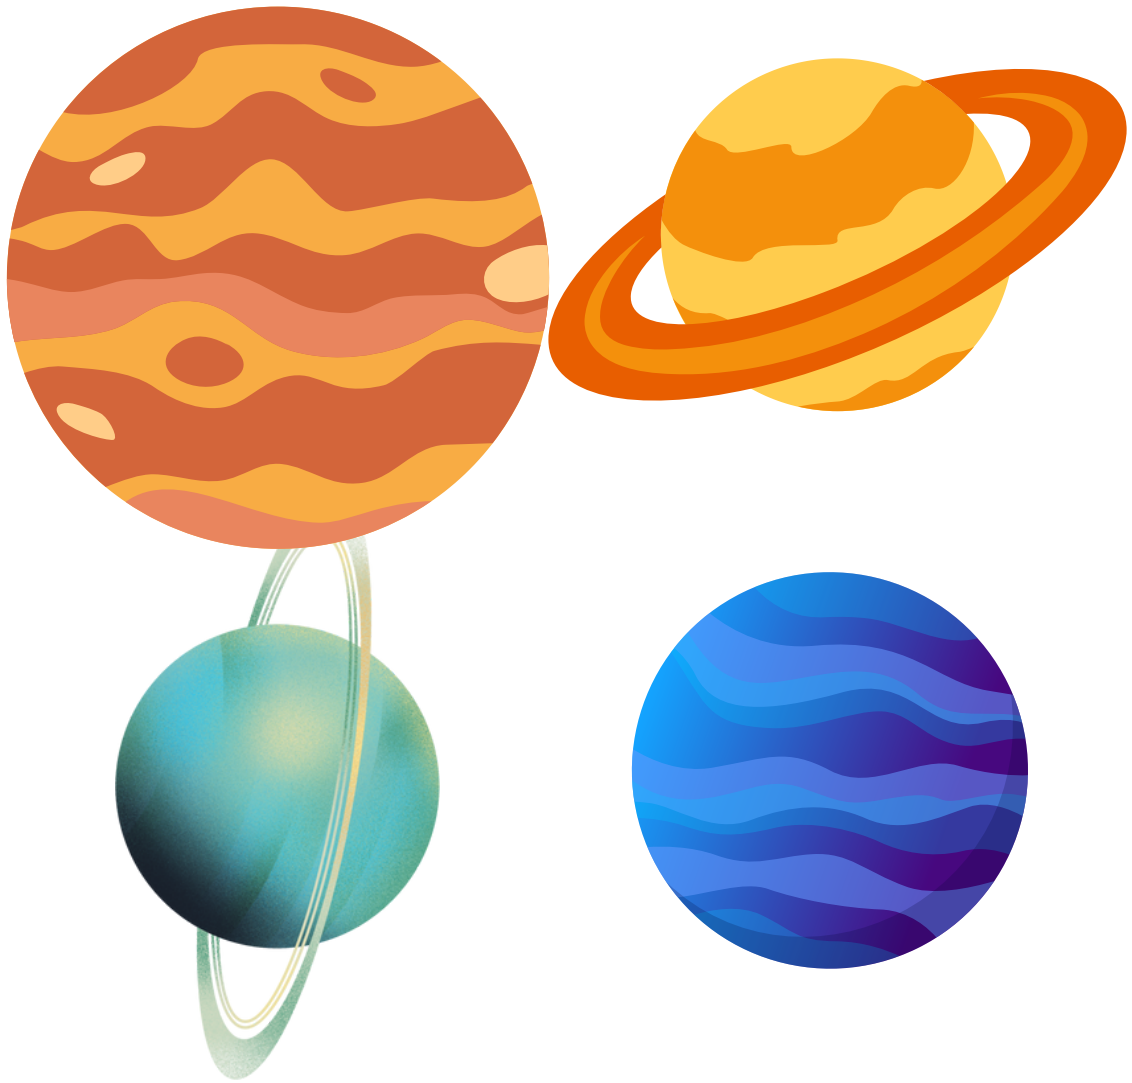

universal force of  
attraction acting  
between all bodies of  
matter

# Inner planets

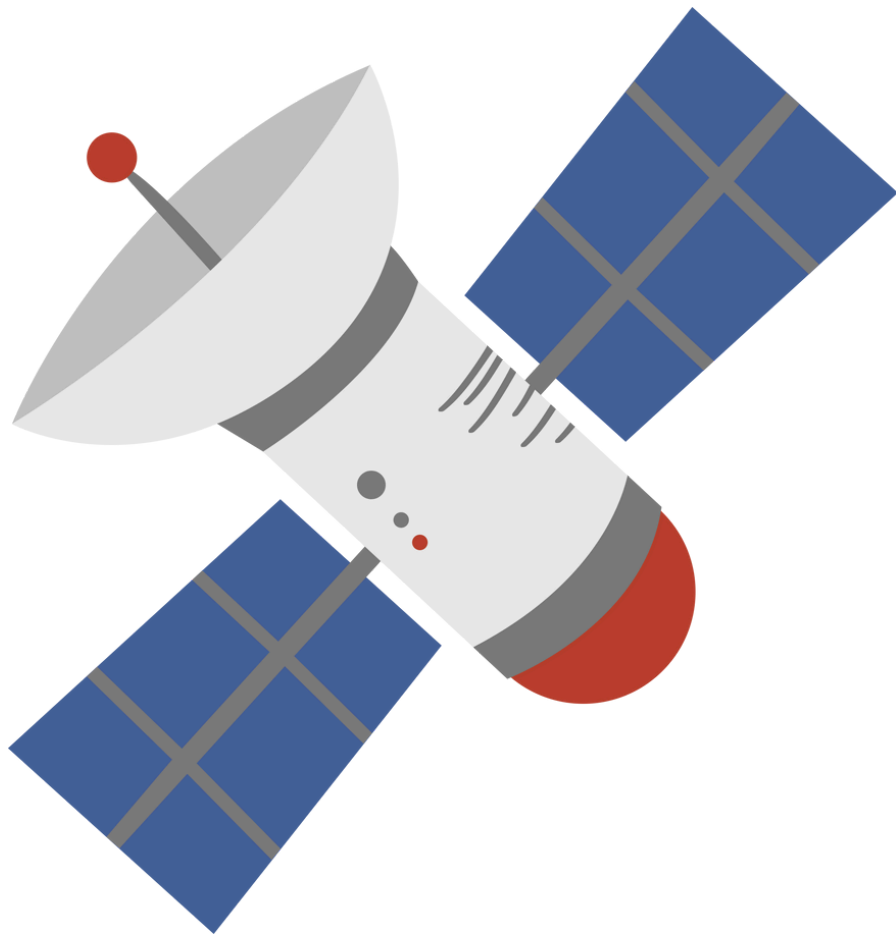

first four planets of  
solar system  
made out of rock

# Outer planets

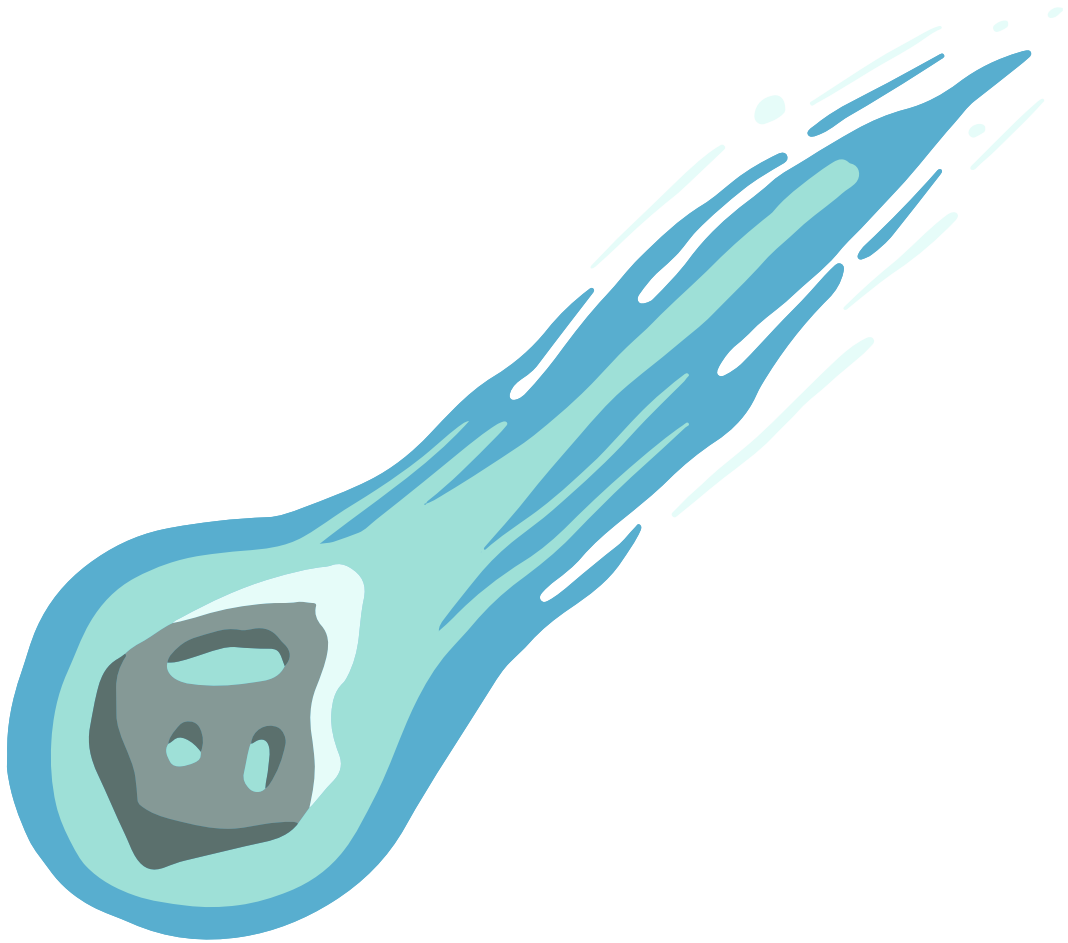

last four planets of solar  
system  
made out of gas

# Satellite

A celestial body that  
revolves around a planet  
(moon or human-made)

# Comet

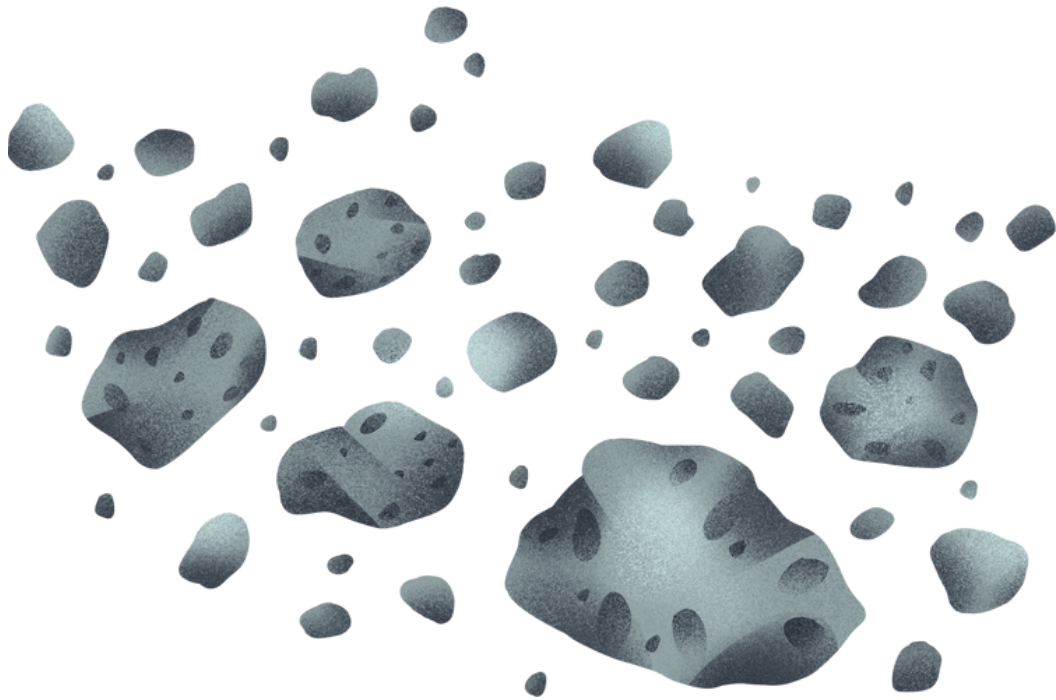

Small mass of dust and  
ice that create a  
"glowing tail"

# Meteor

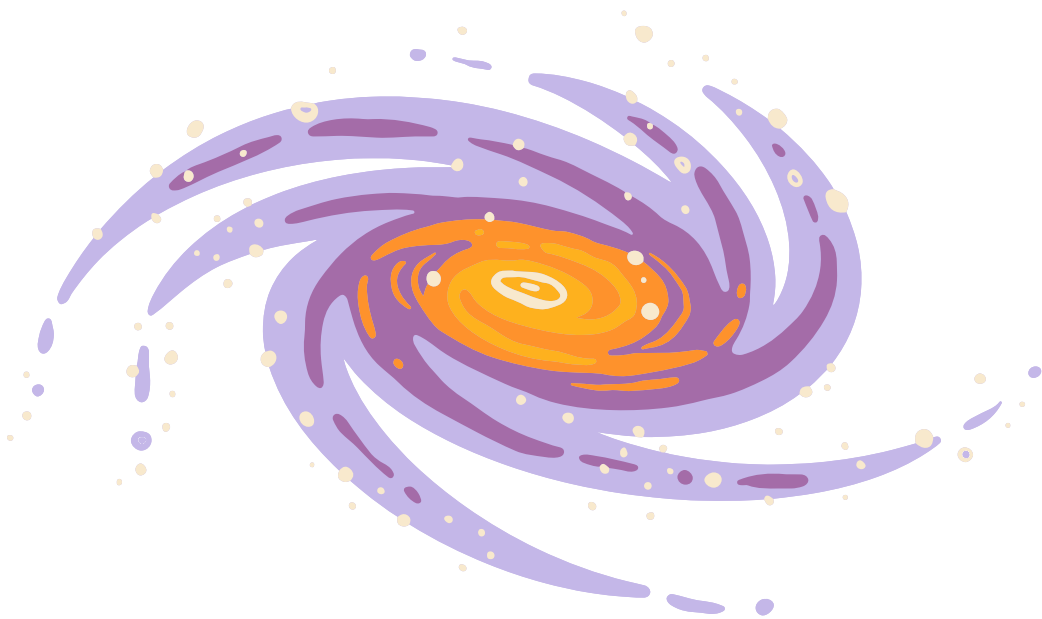

Rocks that travel  
through space

# Asteroid

A small rocky object  
that moves around the  
sun; makes up the  
Asteroid Belt

# Galaxy

place in space filled with  
stars, gas, dust, and  
celestial objects
