

Number 0:

“Round and round, like a
ring”

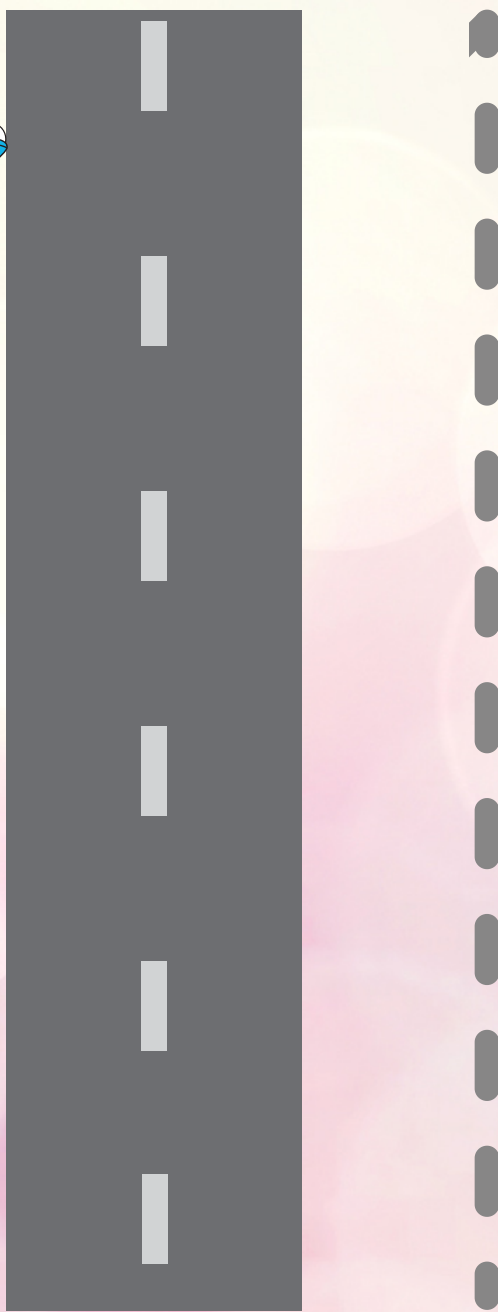

Zero’s shape, said the king!”

Number 1:

"Straight line down, that's the way to
start,

One tall line, it's the number's part!"

Number 2:

"Around and back, like a swan's neck,
That's how we make a number two,
check!"

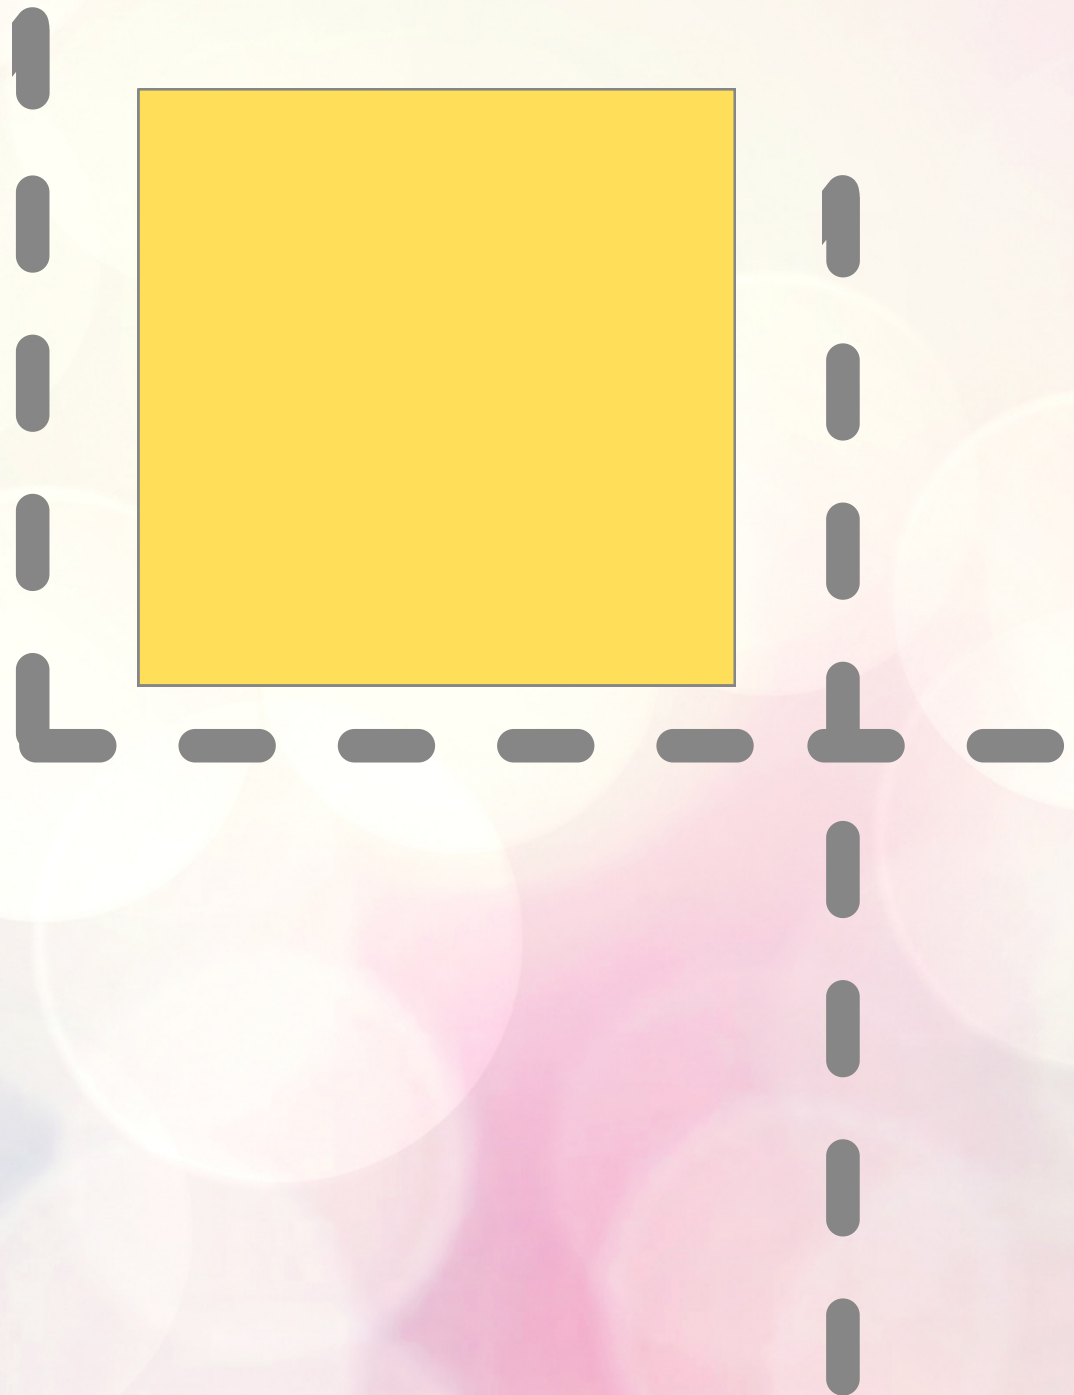

Number 3:

"Around a tree, and around
again,
Number three, curves like a
bend!"

Number 4:

"Down and across, a little
square,
Number four is a shape we
share!"

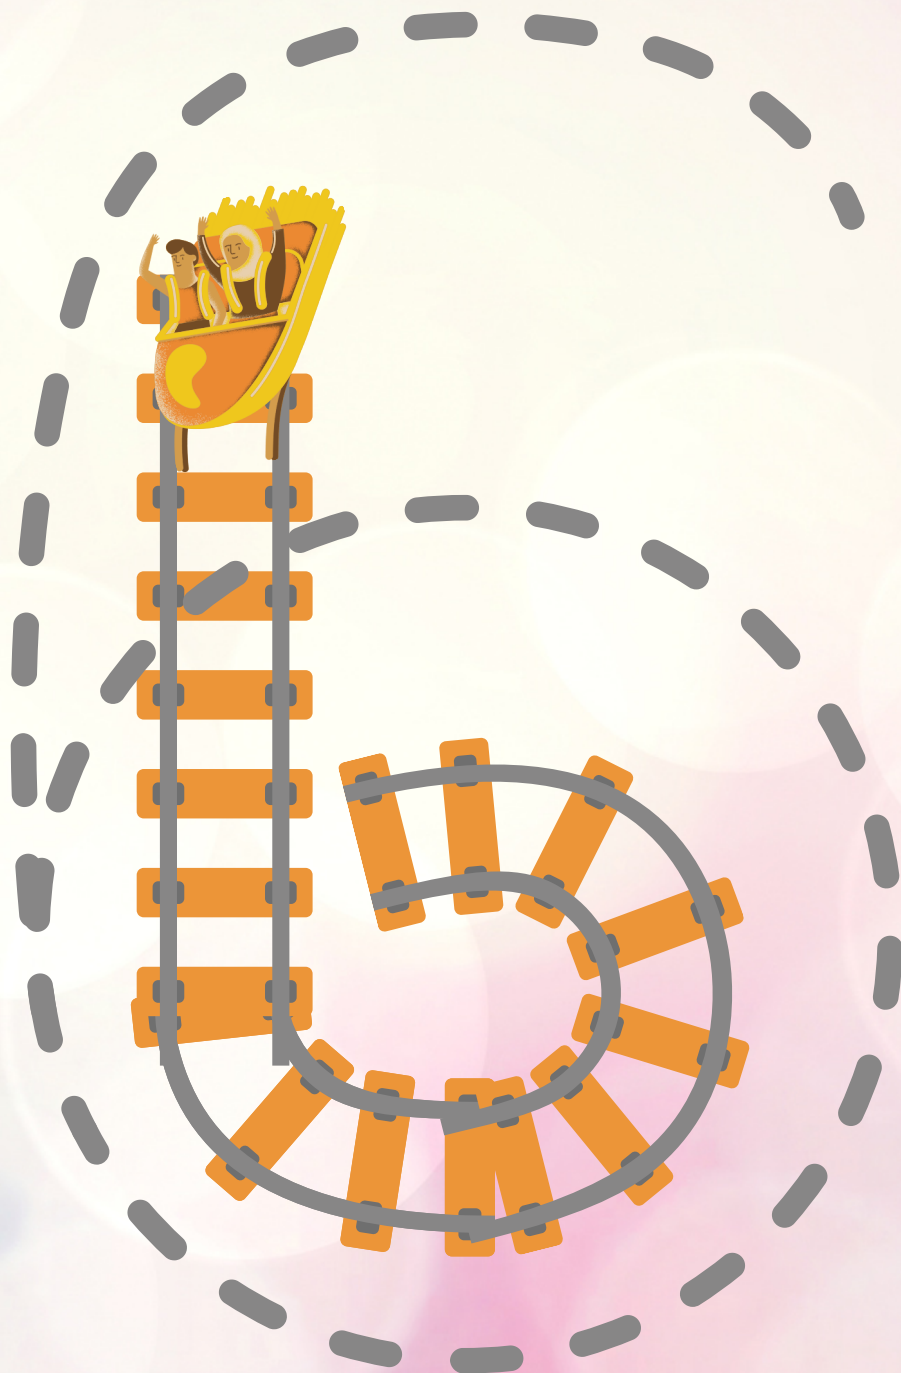

Number 5:

"Down like a slide, then make
curve,
Number five, pick and serve!"

Number 6:

"Down we go, like a rollercoaster's
track,
Number six, there's no turning back!"

Number 7:

"Across the sky and diagonally
down,
Number seven, like a tilted crown!"

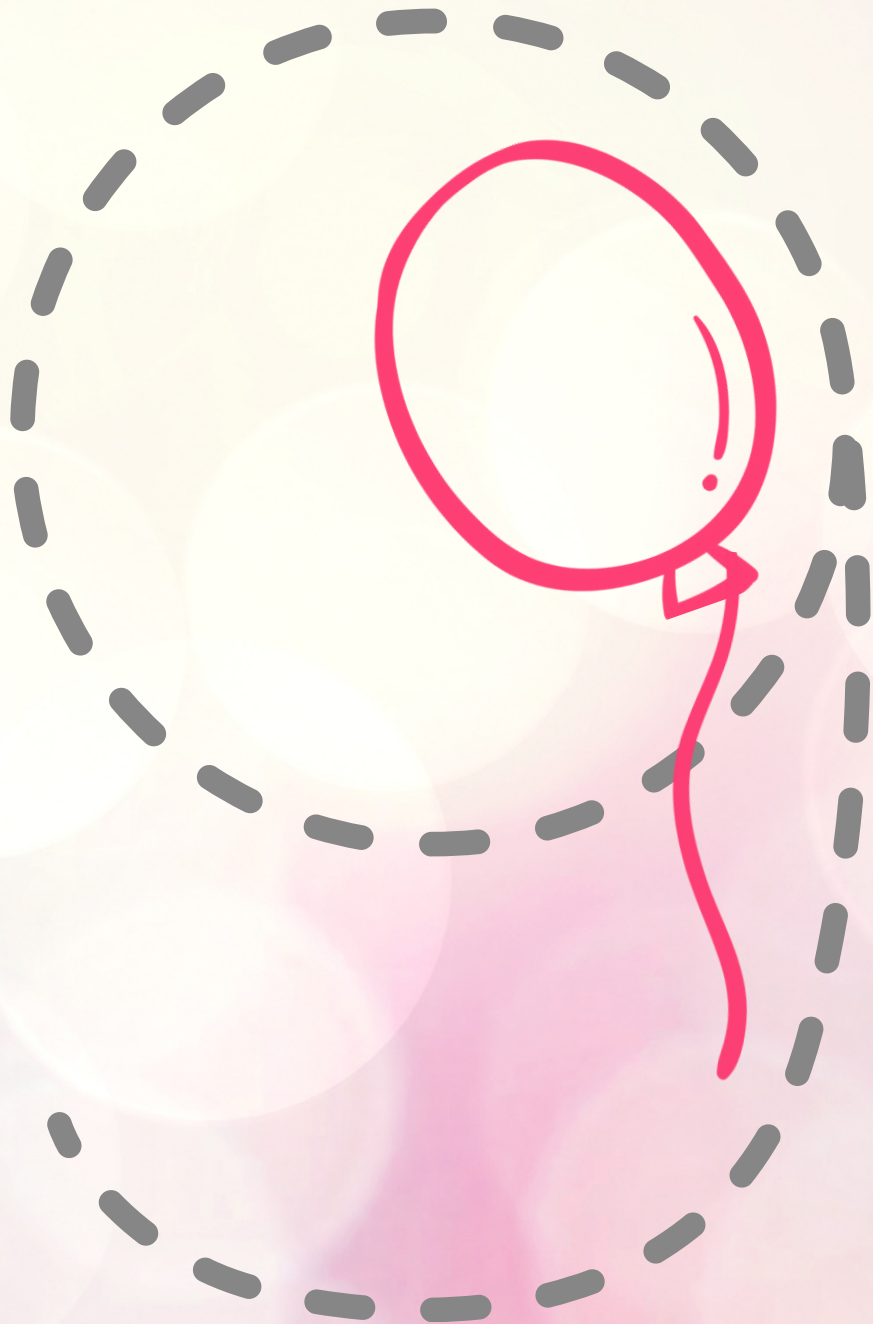

Number 8:

"Make a snowman, that's the
way,
Number eight, round and round
we sway!"

Number 9:

"A loop and a line, like a balloon's
string,
Number nine, what joy it brings!"

Number 10:

"One and zero, together they
meet,
Number ten, a double-digit
treat!"
