

Weather

Weather refers to the atmospheric conditions that occur in a particular place at a specific time.

Thunderstorms

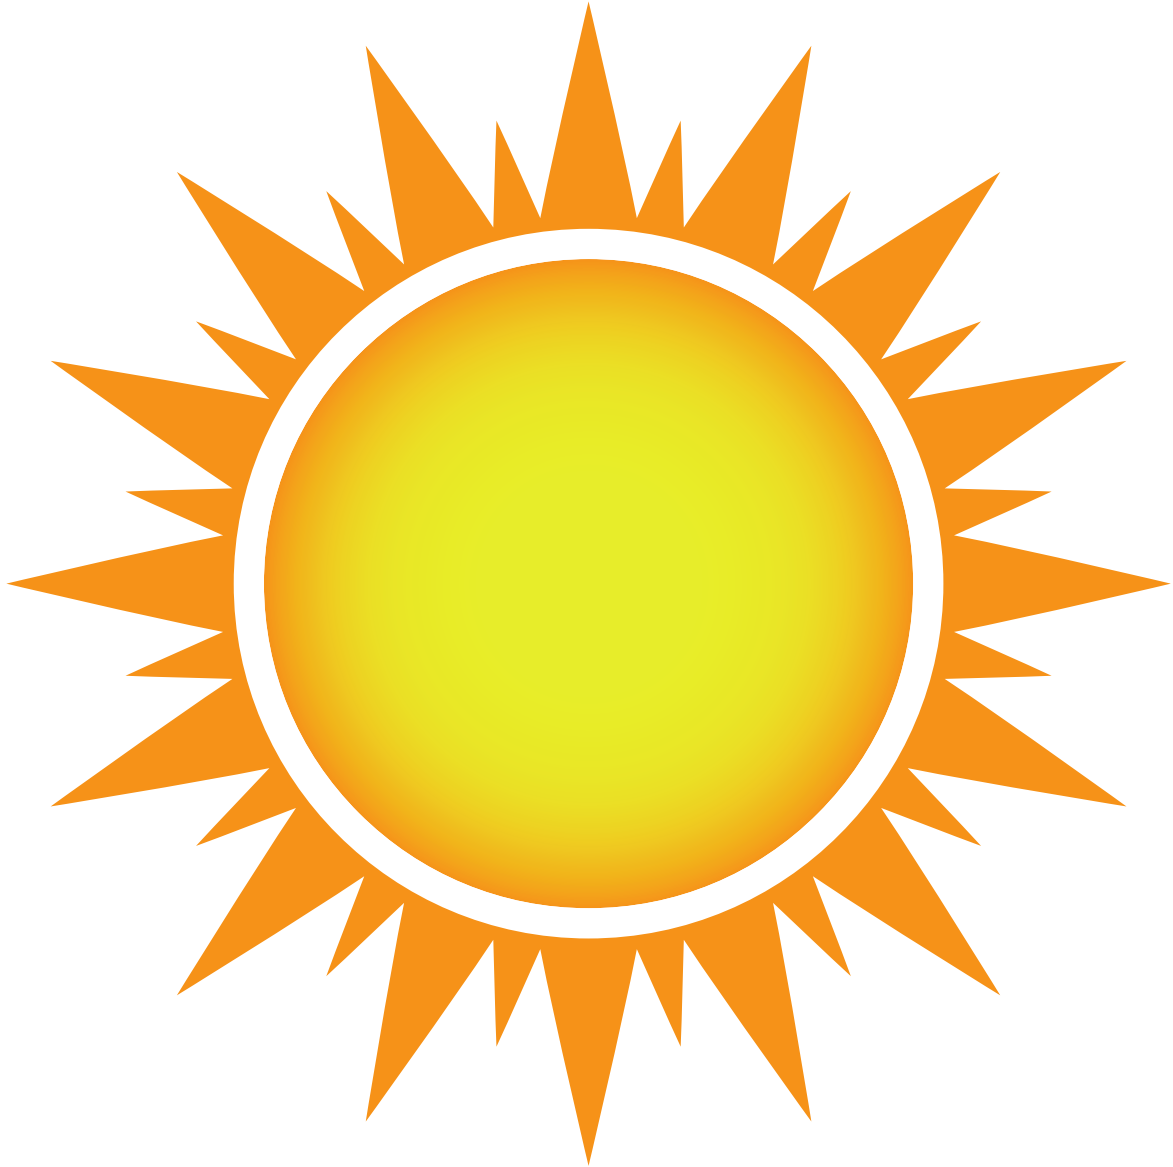

Thunderstorms are characterized by heavy rain, thunder, lightning, and sometimes gusty winds.

Rainy

Rain occurs when water droplets fall from the clouds to the ground. Rainfall can range from light drizzle to heavy downpours.

Sunny

The sun is visible, and there are no significant weather phenomena occurring.

Windy

Violently rotating columns of air
that extend from a
thunderstorm cloud to the
ground.

Snowy

Snowfall happens when the atmospheric temperature is below freezing point, and water vapor freezes into ice, falling to the ground as snowflakes.

Overcast

In an overcast sky, the clouds typically appear thick and can obscure the sun or moon, causing a dim and gloomy atmosphere.

Cloudy

When the sky is covered with clouds, blocking the direct view of the sun or moon.
